
PRODUCT CATALOGUE

It's easy with Pic!

The products contained in this catalogue are manufactured either by Pikdare S.p.A. or third-party suppliers who, in certain cases, own the associated CE marking.

For any further information you can make reliance on the information printed on the product packaging or contact Pikdare S.p.A.

It's easy with Pic!

OUR ESSENCE

Every experience with **Pic Solution** always includes a **human touch** that translates as **easiness**.

For **products**: intuitive, ergonomic and easy to use.

For **advice and information**: immediate, pleasant and relevant.

OUR VALUES

SIMPLICITY

Our every gesture and every invention speaks to what has always been **our authentic DNA: making something simple that wasn't simple before**. To solve small every day health issues with the simple stand most comfortable approach possible.

EMPATHY AND CARE

We are people who care for other people, which includes **listening, dialogue and human interaction**. We interact with people who are searching for solutions to the natural everyday need for well-being.

RESPONSIBLE AND RELIABLE

The starting point for **all of our projects** is the awareness that we are a reference for the health of millions of men and women. And that guides our work, our decisions and our growth. We always aim **to offer solutions that are efficient, reliable and easy to use**.

REAL INNOVATION

Our objective is real innovation. To achieve that objective, **we combine technological capital and human capital** (enthusiasm, sensitivity and extreme expertise) on a daily basis. Generating a sturdy and tangible evolution of the tools needed for people's well-being.

OUR VISION

Just like everyone else, we dream of a **better future** for our world. Including in terms of **well-being**. To achieve that dream, we constantly offer people what we have and what we know how to do best: our technology, **our know how, our hard work**. All this to contribute to the development of a society that is more evolved, including in terms of its relationship to personal health. **Easier, more direct and finally within everybody's reach. None excluded.**

OUR MISSION

Many **obstacles**, like anxiety, nuisances and complicated products, limit our perseverance in caring for our own health and interfere with even the best intentions. That's why we stand beside people providing them with tools and solutions, including intangible solutions, to help put health first through a natural and, where possible, pleasant approach.

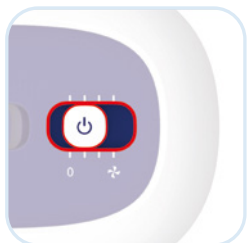

It's easy with Pic!

D.L.S. DESIGN LANGUAGE SOLUTION

Brand value and design come together.

The new language of

applied to product development

The **new Design Language Solution** is the result of an approach **inspired by nature**. **Solid, calm, pure forms** that become clear **points of contact** with the brand's **key values**. Through shapes and colors, the aim is to turn every product into an icon able to convey:

BELONGING, EMOTIONS &

- VALUES**
- **Expertise:** Advanced technology to meet consumers' needs;
 - **Empathy:** Close to consumers' needs;
 - **Innovation:** Simple solutions that help people.

Symmetrical and balanced shapes to communicate **reassurance, reliability and closeness**.

The **white mat surface** emphasizes **calm and pureness**, while the **gloss blue** core conveys a feeling of **competence and technology**.

It's easy with Pic!

PiC Diabetes Care: as always, a key to freedom.

PiC has always been close to people. Its experience in selfcare is based on a thorough knowledge of customers and on the ability to understand their deepest needs.

This attention and ongoing research have created PiC Diabetes Care, a complete range of simple and innovative products designed to help manage diabetes and its complications freely, at any time.

PiC Diabetes Care means scientific research, sensitivity and experience. It means a full and free life.

Insupen ADVANCED

Insupen Pen Needles

All the most advanced Pic technological features in a single line of pen needles. The larger internal diameter obtained thanks to the extremely thin walls, increases the flow*. The specific triple sharpening and the anti-friction treatment facilitate the sliding of the needle in the skin.

* At equivalent needle length and gauge.

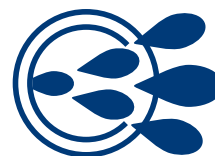

SoftSharpening

Sharpness that minimises discomfort.

EasySliding

Lubricated walls, easier to slide

RapidFlow

The new frontier of thin walls

MADE IN ITALY

Insupen ORIGINAL

Insupen Pen Needles

A new line born from Insupen's historical successes: the triple Soft Sharpening and the wide range to satisfy all injection habits.

SoftSharpening

Sharpness that minimises discomfort.

MADE IN ITALY

Pen Needles

Insupen ADVANCED

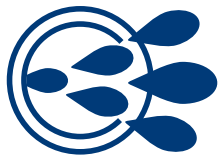

STERILE EO

MADE IN ITALY

Needles intended to be used with pen injector devices for the subcutaneous injection of drugs. Sterile, single use, single patient, pyrogen-free, non-toxic. Triple-sharpened needle. Silicone-coated to ease skin penetration. Cartridge tip is anti-friction treated for easy, fragment-free cartridge puncture, preventing rubber fragments from falling inside the cartridge. Ethylene-oxide sterilized.

Insulin Syringes

Insumed

U-100 Insulin syringes
with magnifying lens

STERILE EO

MADE IN ITALY

CODE

DESCRIPTION

UNIT

No-dead-space syringes for
subcutaneous insulin therapy
injections.

Sterile, single use, single patient,
pyrogen-free, non-toxic, with
needle fixed directly on the
syringe.

Graduated insulin unit scale.

Gradation U:

0,3 ml – ½ unit

0,5 ml – 1 unit

1 ml – 2 units

Latex-free, flat, triple-contact rubber plunger with
plunger stopper to prevent accidental leakage.
High-transparency barrel with clearly readable
graduated scale for better dose precision.
Ethylene-oxide sterilized. In protective packaging-
sterility guaranteed by the sealed caps at each end of
the syringe.

Box of 30 pieces, 3 bags containing ten syringes each.

Pic Gluco·Test

GLUCOMETER

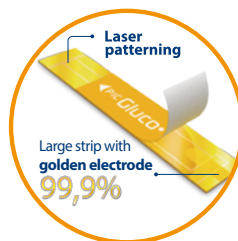

Complete and practical Kit, contained in a small clutch bag to take everywhere, for an easy and fast glycemetic measurement. In just 5 seconds the result is accurate and precise according to the limits of the relevant standard.

Unit of measure: mg/dL.

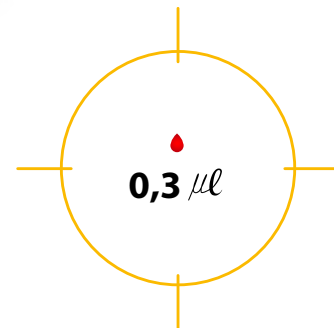

The kit contains:

- a glucometer
- 10 strips
- 1 lancing device
- 5 30G lancets
- 5 32G lancets (thinner)

It ensures optimal **performance accuracy**: thanks to the **Gold electrode** which provides the **best performance** in terms of electrochemical reaction.

RAPID DRAW TECHNOLOGY: a **rapid-absorption technology** that **minimises the amount of blood needed** and the risk of having to repeat the prick because the blood sample is not enough.

CODE	DESCRIPTION	UNIT
02054000100000	Glucometer Kit	4 boxes

Pic Gluco·Test Diary™

STERILE R*

BLOOD GLUCOSE METER WITH BLUETOOTH

Complete and practical kit, contained in a small clutchbag to take everywhere, for an easy and fast glycemic measurement. In just 5 minutes the result is accurate and precise according to the limits of the relevant standard. All the features of Pic GlucoTest, with the added benefit of digital connectivity.

Unit of measure: mg/dL.

Pic Health Station

Pic Health Station app allows the Pic GlucoTest Diary™ to connect to the patient's smartphone providing even more complete control over blood sugar levels.

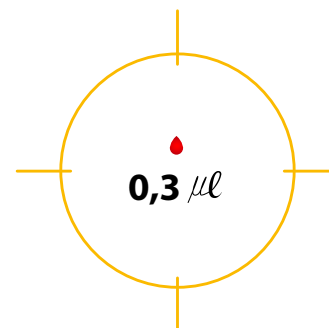

The kit contains:

- a glucometer
- 10 strips
- 1 lancing device
- 5 30G lancets
- 5 32G lancets (thinner)

It ensures optimal **performance accuracy**: thanks to the **Gold electrode** which provides the **best performance** in terms of electrochemical reaction.

RAPID DRAW TECHNOLOGY: a **rapid-absorption technology** that **minimises the amount of blood needed** and the risk of having to repeat the prick because the blood sample is not enough.

New Pic Safe range.

Chasing safety without changing procedures.

The **Safe Block** safety pen needles and **Safe Digitest™** and **Safe Digitest™ Plus** safety lancets have been developed to help reduce biological hazards during insulin therapy and glucose level monitoring.

Safe•Digitest™

Contact-activated safety lancets for healthcare professionals.¹

It requires **minimal training** for healthcare professionals and **little time** to perform blood test. **The closed body** is designed for easy handling. Thanks to the **wide range**, it meets both patients and healthcare professionals needs.²

Safe•Block

Safety pen needles intended for use with pen injector devices for the injection of drugs. Can be used by healthcare professional users and lay users. Safe Block: Safe, Simple, Smart, Soft. All in one touch.

It's SIMPLE: Designed for easy handling and simple use⁵ available in **3 different needle lengths** to meet individual needs.

It's SOFT: Design for COMFORT OF USE: thanks to a wide safety shield front end surface which may disperse and reduce pressure on the injection site; thanks to a hidden needle from the view⁶; thanks to a special and unique lubrication method to cause smooth and less painful injection.

It's SMART: Designed with a **needle viewing window** which allows an easy confirmation of drug flow (priming⁶); the thin wall allows easy and optimal drug delivery⁷; the **ergonomics** is provided by a special wing-design, for a comfortable and secure grip⁶.

NEW

QuickGen

MADE IN ITALY

PLASTERS WITH HYALURONIC ACID

The new line of Pic plasters with cicatrising powder is able to speed up healing. Ideal in case of **grazes, abrasions and burns exudate**, it uses the properties of the hyaluronic acid present in the pad to speed up the **tissues regeneration and protects the wound from bacteria and external agents**. Available in **different size** depending on the **wound**; its **support in non-woven fabric** is **gentle on the skin** and at the same time **does not prevent the fluidity of movements**. The **butterfly format**, on the other hand, is **made of PE**, even **more elastic and adaptable** and therefore particularly **suitable for applying on difficult areas such as joints**.

Plasters with antibacterial pad

Risk of Infections

Even the **smallest cut can become infected** and the same is true for **surgical wounds**.

Bacteria that may come into contact with a wound can cause infections: they proliferate destroying the tissues of the lesion.

When a wound becomes infected:

- **Healing is slower** because the bacteria proliferate and spread in the tissues damaging them.
- **It hurts;** this means it becomes painful when moving or changing the dressing.

Moreover, the risk of infection of a surgical wound increases depending on:

- **Specific characteristics of the wound:** size and/or depth, contamination during the surgical procedure, necrotic tissues or foreign bodies.
- **Poor hygiene in caring for the wound.**
- **Other debilitating factors** that increase a patient's exposure to risks.

The solution: plasters with antibacterial pad

Thanks to its extensive experience in the dressing market, PiC Solution has developed **plasters with a pad treated with Chlorhexidine Digluconate**, an antibacterial agent that reduces the bacterial activity and prevents their development in the pad's microenvironment.

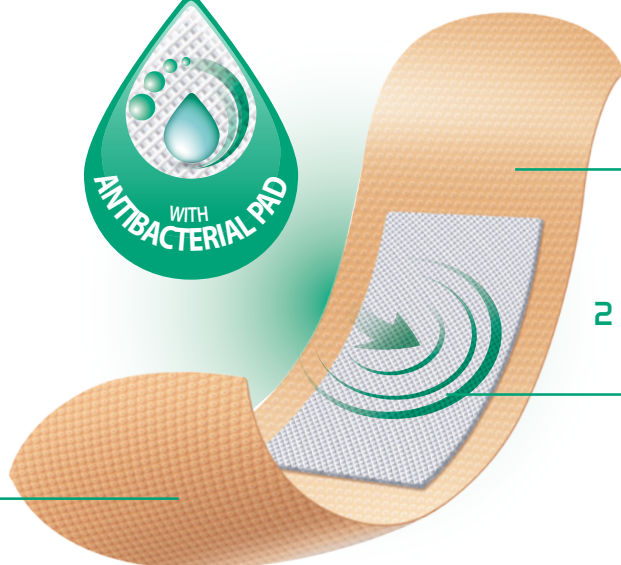

Why Chlorhexidine?

The **Chlorhexidine Digluconate** used to treat the pad of Pic plasters has a broad spectrum of **antibacterial activity**. It acts on different types of microbial cells and prevents their proliferation.

What are the main advantages of chlorhexidine?

- Broad-spectrum **antiseptic action**.
- It minimizes the risk of infection and consequently it **helps the healing process**.
- Allows control of the microenvironment of the pad.
- Avoids infection.

1 - Hypoallergenic

2 - Anti-adherence net

3 - Breathable

MADE IN ITALY

Strip Plasters

AquaBloc

Water-and bacteria-proof plasters

MADE IN ITALY

Ultrathin waterproof, bacteria-proof plaster made of special transparent polyurethane that allows the skin to breathe. Thanks to its special **hydrophobic pad**, blood does not rise to the surface.

Bende a rete

MADE IN ITALY

Tubular bandage

Stretch tubular bandages are specially indicated to secure dressings needing frequent changes and are ideal where complete freedom of movement and maximum aeration are required, especially on large or awkward body areas. Ultra-stretchy with high tensile strength for easy application and removal. The broad knit weave allows the dressing to be monitored without removing the bandage and guarantees **very good elasticity, breathability and strength**.

Each bandage has a woven coloured thread indicating the gauge and therefore the field of application. Available in a wide range of sizes **for most part of the body**.

Co Fix

MADE IN ITALY

Self adhesive compressive bandages

Co-Fix bandages are particularly suitable **for joints** and **and moving parts of the body**. With latex particles, so that the bandage adheres to itself and not on skin or hair. The elastomers in the fabric guarantee long-lasting elasticity and compression strength.

CODE	DESCRIPTION	UNIT

*ATTENTION: this product contains latex, which may cause allergic reactions, including anaphylaxis.

Flexa Elast

Elastic support bandages

Flexa Elast bandages are particularly indicated **for restriction of joint movement** while ensuring the necessary support. **The fabric is quite lightweight, soft and smooth and has a high cotton percentage for good skin tolerance.** The fabric's balanced rigidity/elasticity gives a medium stretch. The fabric is stiff enough to retain the joint, while it is sufficiently elastic to exert light compression and ensure easy handling when applying the bandage. With stitched edges, which do not unravel or roll up when the bandage is under tension.

Professional plasters

Securfix

MADE IN ITALY

STERILE EO

Non-woven cannula fixing kit

Ready-to-use sterile kit: it enables a safe, practical securing of catheter needle. Ideal and indispensable aid for non-traumatic IV therapy. The kit consists of:

- Hypoallergenic non-woven fabric plaster to secure the needle.
- Catheter outflow line securing plaster to ensure the needle is not dislodged from the vein.
- Anti-decubitus pad to be applied under the catheter for long-term application, ensuring a more comfortable permanence.

Emo Soffix

MADE IN ITALY

Special post blood-drawing plaster. The super-absorbent pad expands in contact with blood or other liquids, creating a slight pressure on the drawing spot. The elastic, hypoallergenic non-woven fabric backing makes the plaster particularly suitable for delicate, sensitive skins. With Emo-Soffix there's no need for cotton, scissors or plasters after taking blood samples.

BPM AND SCALES

It's easy with Pic!

Pic Heal

th Station

Pic presents a project that extends beyond products

A project that combines simplicity, modernity and smart technologies.

A project closely connected to people's needs, that evolves with their habits and knows how to create unique opportunities for pharmacies looking to the future.

A project that will soon be enriched with new protagonists, that are capable of renewing various areas of healthcare. Stay connected.

Rapid Tech Comfort Experience™

Inflating measuring technology by Pic to match people's needs in blood pressure monitoring

The **RAPID TECH comfort experience™** is a technology that allows a rapid and comfortable measurement during cuff inflation, for a fast control.

Technology is most effective when it makes people's lives simpler: each of the Brand's new blood pressure monitor of the Rapid line features **Rapid Tech™**.

Speed

Measurements are taken **faster, reducing the waiting time** for results and the anxiety this generally causes.

Comfort

The discomfort caused by **arm compression is reduced** thanks to the measurement during inflation.

Accuracy

Faster measurements don't affect the accuracy.

Rapid line, indeed, is clinically validated in accordance with the **protocol** defined by the **European Society of Hypertension (ESH)**.

RAPID Line - Digital BPMs

mobileRAPID

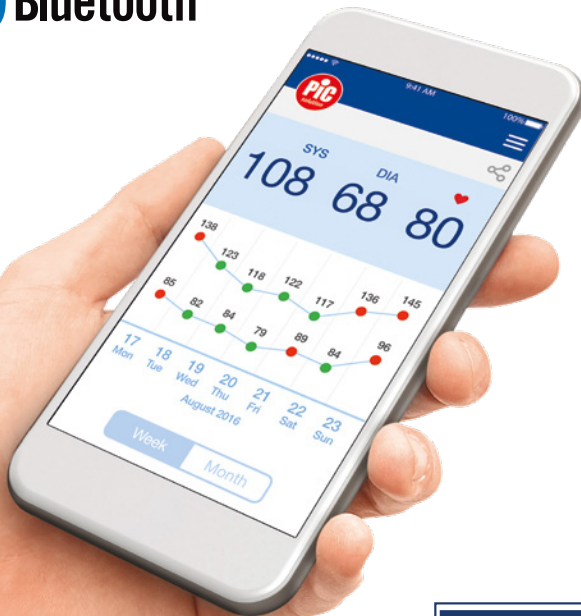

ALL IN ONE, TUBELESS AND EASY TO USE.

The first Pic arm blood pressure meter, with no connection tubes. For an advanced, comfortable and user-friendly measuring process.

The exclusive Pic technology measures blood pressure right from the inflation stage, increasing comfort and reducing waiting times.

CONNECTED WITH PIC HEALTH STATION APP

CAN ALSO BE USED WITHOUT A PHONE

Main features:

Rapid Tech Comfort Experience™ takes the measurement during the inflation phase.

- Irregular heartbeat detector
- ESH scale –blood pressure indicator
- 100 x 2 memories
- Motion detector
- Large backlit display
- Average of last 3 measurements
- Date and time of each measurement
- M-L (22-42 cm) extended size cuff
- Travel bag and quick reference user manual
- Video tutorial: a step-by-step guide to become acquainted with the product.

Rino Shower

MICRONISED NASAL SHOWER

Nasal shower of compact size, lightweight and easy to use and grip. RinoShower can be used in combination with piston nebulizer for the hygiene of the nasal cavities. It is ideally suited for clearing the upper airways since it produces particles of the right size to treat them. It can be used by both adults and children thanks to its two cones. Its liquefying action removes secretions, mucous and catarrh and helps hydrating the mucous membranes.

The power of heat

All the advantages

The thermal energy allows obtaining various benefits thanks to the physiological effects of heat and cold.

The transmission of thermal sensations takes precedence over the perception of pain impulses, leading to a reduction in the intensity of pain sensation.

Hot Therapy

Heat is one of the oldest methods to **relieve pain and treat spasm & contractions**.

Reccomended for **muscle pains (es. in case of contractures, cramps) and articular pains (es. in case of articular stiffness)**.

Cold Therapy

Cold applications are indicated in **all states of inflammations**, in particular **sprains, strains, toothache and insect bites**.

Easy Steril Box

MADE IN ITALY

STERILE R

Easy sterile box is a urine collection container equipped with a handle to facilitate collection. It is practical, and thanks to its handle, collection is easier and more hygienic, preventing unpleasant spillage. The container is sterile, has a 100 ml capacity, a screw cap and a label for easy sample identification. Graduated scale from 20 to 100 ml. Individually wrapped and sealed.

What You Need to Know About

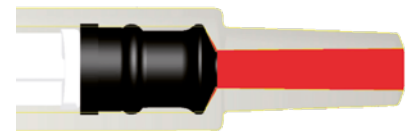

Covid-19 Vaccination campaign Project

The MTD Group, leveraging its Research Hub located in Como (Italy), with its decades of experience in designing and producing needles and syringes, has made investments to take part in the global effort to supply products that will minimize vaccine waste, and help to accelerate the COVID-19 vaccination effort according to the above recommendations.

Dead Space Volume

It is the amount of fluid/vaccine that is contained in the injecting device, but not inoculated in the patient. (shown in red in the photo on the right)

This volume remains “trapped” inside the injecting device after the inoculation is completed.

Regular Syringe

Low Dead Space Syringe

A syringe is called “Low Dead Space” when the design of the device **reduces this waste, in comparison to a standard syringe. Low dead-space (LDS) syringes** can enable HCPs

to extract more doses from a single vial of COVID-19 vaccine, thus minimizing vaccine waste.

LDS Syringe

- ✓ 1ml LDS (low dead space) syringe
Luer Slip, to be coupled with a
- G25 x 1" needle
 - G23 x 1" needle

All the products are

	Syringe type	Reference No.	Needle type	Reference No.
Luer slip Low Dead Space (LDS) syringe, to be coupled with 23Gx1" or 25Gx1" needles

Syringes without needle

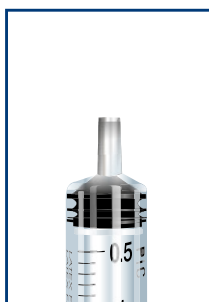

Single use, single patient, pyrogen-free, non-toxic sterile syringes. Triple contact rubber gasket and plunger-block to prevent accidental leakage during aspiration. High transparency barrel and plunger, with easy-to-read graduated scale.

Use: injections or collection of biological material.

Conicity of the syringe

CENTRAL LUER

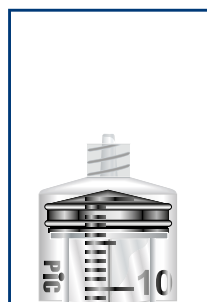

It's the most common. The needle is pressure-mounted with a slight clockwise rotation.

ECCENTRIC LUER

The connection is the same as the central luer but is positioned laterally.

LUER LOCK

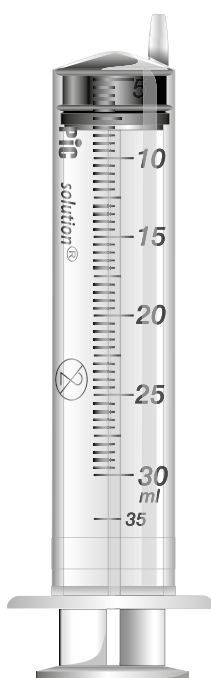

Compared to the luer cone, the luer lock features a thread into which the needle screws.

CATETHER

Allows the attachment of a syringe onto a catheter.

Central or Eccentric Luer

Whitacre spinal needles*

*Subject to availability

Sterile, single use, single patient needle for local anaesthesia, Luer Lock hub. In individual Peel Pack blister. International colour coding. With mounted introducer needle. WHITACRE pencil tip with no sharp edges separates fibres without slicing. The lateral hole shape and its position relative to the tip allow rapid CSF reflux and analgesic administration, reducing the risk of saddle block.

Use: subdural, lower thorax and lumbar spinal puncture.

is a brand of Pikdare S.p.A.

Pikdare is a company of MTD Group a leading group in med-tech that designs, develops and delivers innovation globally through a comprehensive range of safety sharps and medical devices for diabetes management and personal care. MTD is a holding company founded in 2018 by the union of two historical and leading companies in the health market: Pikdare and HTL-Strefa that together count over 80 years of experience in these areas. MTD products are designed to improve the safety, quality and comfort of use of medical equipment for both patients and healthcare professionals. The group's headquarters are located in Lugano, Switzerland. MTD has a direct presence also in Italy, Poland, USA, Canada and France, with 4 plants in Europe (Italy and Poland) and a widespread distribution of its products in over 100 countries.
